One of the tricks anti-White jews like this fuck use is they engage in typically Jungian psychology, where any effort on the part of white racialists to defend their people is met with the “projection” or “you’re manipulating people” charge. And they do this because they have no other way of challenging the facts. Whites are killed at higher rates by non-whites than any non-white is killed by whites or police, but they twist the narrative to make you think the opposite. The Marxist jew Supremacist oppression of colored peoples comes to the fore even though every corporation, celebrity, politician and institution of power canonized George Floyd and the few who said anything about Cannon were attacked by everyone for “fomenting a race war”.

White people didn’t foment a race war, the war is already here. If triggering corporate jew twits like this is what it takes, than so be it. People like “angry white men” will never be satisfied until all white people are dead. And as to the “hijacking his death” charge, let me remind you that if the parents had taught their kids never to be around blacks, Cannon would still be alive with us. And notice the outrage is not over Cannon’s death, but over the reaction to it. This proves my point that these anti-whites will never be satisfied until all white people are either mongrelized or dead.
